DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Moynihan et al. (U.S. 5,659,346).

Moynihan et al. discloses an inkjet printer comprising:

a channel plate (fig. 8, element 87) made of silicon (column 4, lines 9-15) having a plurality of ink channels etched into at least one surface thereof (89, 91),

associated actuators (87),

means defining an ink reservoir (86) communicating with the ink channels, the reservoir defined by a base member (85) made of a material different than that of the channel plate, graphite (Column 4, Lines 8-15),

wherein the channel plate is adhesively fixed to the base member (column 6, lines 4-7),

wherein the base member (85) forms a support plate sandwiched between two separate channel plates (87, 88).

3. Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Yamamoto et al. (U.S. 6,036,303).

Yamamoto et al. discloses a method of manufacturing an ink jet printhead comprising the steps of:

assembling the channel plate (fig. 1, element 20), flexible sheet (50) and actuator block (18) together to form a unit which is then fitted to a base member (16).
